

THE IMPORTANCE OF A CAR...John Weaver

Question: What is the importance of a car for a systemite?

Jesus speaking in prophecy: The car has been the number-one idol of the systemite for quite some time now, although the smart phone is continually rising in importance and among young people is more important than a car in many parts of the world. The car is one of the most prized possessions of those systemites that can afford one, which is almost everyone in the U.S. and most people from the lower middle-class on upward in the rest of the world.

The car is important to most systemites because it shows everyone their worth. Now, their house or apartment and in what neighborhood it is in also shows their worth, but more people see their car than their house, so they usually feel they show off their worth more with their car. Since a systemite is taught from a very young age that a man's life consisteth of the abundance of the things which he possesseth, he judges his own self-worth and the worth of others by what they have and not only how many things they have but also the value of those things determined by how much they cost.

So how much a car costs is very important to the owner of the car but also a car has other characteristics that make it so important an idol. The shiny paint is very important as idols throughout history needed to be shiny and sleek looking, which brings up another important characteristic of a car, the design of its body. For a car to be a really good idol, it needs to have appealing lines that please the eyes. The most expensive cars usually have this feature.

It should also be noted that cars lead many people to an early death as they get accustomed to moving around everywhere in their car almost as much as a person confined to a wheelchair and as a result get very little exercise and many times get overweight, which leads to poor health. Cars also give people a false sense of freedom, that they can go anywhere they please whenever they want to. There is also something about speed that appeals to people and some are under the influence of speed demons more than others.

Another very important characteristic of cars that is so important for the Devil is that they cause death and injury in traffic accidents to so many people. Not since the time of Moloch have idols been so good as this one. I will be so happy when I will finally destroy the Devil's system and with it those demonically created, evil inventions - cars. *Submitted by John*
